

KEY TO MAP

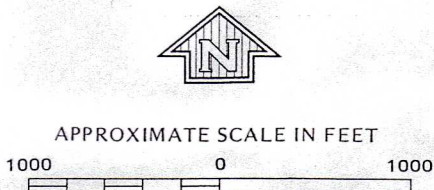

NOTES TO USER

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

This map was prepared to facilitate flood plain management activities only; it may not show all special flood hazard areas in the community or all planimetric features outside of the flood plain. Refer to the latest official Flood Insurance Rate Map for any additional areas of special flood hazard.

Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Table where floodway width is shown at 1/20 inch.

ELEVATION REFERENCE MARKS

REFERENCE MARK	ELEVATION (FT. NGVD)	DESCRIPTION OF LOCATION
RM1	4511.95	Brass cap on steel post marked "U.S. Department of Agriculture- Forest Service Site Survey Marker, elevation 4512 13, 1964," located south of railroad tracks on First West Street east side of road, 1.5 feet south, 1.2 feet west of end post on chain link fence. 1/2 inch steel rod in concrete, located 34 feet west of fence junction, 5 foot north of eastwest fence, 2 feet west of large cottonwood tree.
