

MEETING MINUTES OF A REGULAR MEETING
OF THE BOARD OF ONEIDA COUNTY COMMISSIONERS

The meeting was opened by Commissioner Daniels.

The statistics from the primary election held on May 17 were canvassed.

Commissioner Tubbs made the motion to approve the election results as submitted.
Commissioner Daniels seconded and the motion carried.

The claims were reviewed.

Commissioner Tubbs made the motion to approve the claims as submitted.
Commissioner Daniels seconded and the motion carried.

Road and Bridge: It was found that a citizen had removed the fence and installed a main line irrigation pipe along the roadway located east of the fairgrounds on the old highway. Pictures were presented to show where another citizen had sprayed for weeds in the county right of way and killed the grass as well as the weeds up to the blacktop which will make the road side and road base susceptible to erosion. Scott will provide County prosecutor Cody Brower with specifics so that a letter can be drafted and sent to the parties proclaiming the infractions and instructions to cease and desist.

The culvert has been purchased and will be installed at the north end of 5800 West near the Davis and Edwards properties, to help with the water drainage problem discussed in many previous meetings.

Signs purchased through the sign grant will need to be installed before June.

Plans are moving forward to have the cement dumping site by the county scales south of town, ground up and removed. The site will then become a storage for gravel and sand.

Planning and Zoning: Lola delivered information pamphlets from the Building inspector regarding bid processes etc., to the Commissioners.

BOE: No requests were made to meet with the Board of Equalization so the commissioners moved on to the next agenda item.

The annual airport ICRMP insurance papers were reviewed for approval.

Commissioner Daniels made the motion to approve and sign the ICRMP insurance renewal papers for the airport.

Commissioner Tubbs seconded and the motion carried.

May 23rd, 2016

The road right of way leading to the current ambulance building is in need of some grader work and a diversion built up to help maintain control of water runoff. Commissioner Tubbs will meet with the Road and Bridge crew to see that this is accomplished.

The minutes of the last meeting were reviewed.

Commissioner Tubbs made the motion to approve the minutes as written. Commissioner Daniels seconded and the motion carried.

Narrows project: a letter was received from the BLM requesting that all realignments options be dropped from the proposals and leave only the rebuild of the existing road in the plans for the future upgrade due to the county choosing to eliminate the realignments for environmental reasons.

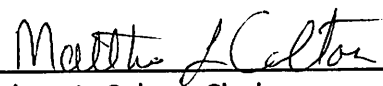

Landfill collection bin replacement: It was discussed and thought to be appropriate that the homeowner should pay for any damage that they cause to the collection cans and that the county would replace the cans damaged from normal wear and use. The current fees for ten wheel and 18 wheel sized trucks to dump at the land fill need to be increased. The amount to increase is still being evaluated and if approved will take effect October 1st, at the beginning of the new fiscal year.

Forest Service: Lori Bell explained that a special use permit for the dock and bathroom facilities by the Deep Creek reservoir needs to be renewed. Her concern is that the use of the reservoir has changed with the "no flotation" devices being allowed on the water. She wanted to get some clarification on the counties involvement and to see what the activity might be, fishing etc., in the future and then renew the permit accordingly. Fish and Game representatives were also present but they only wanted to ensure that the dialogue continues between all parties involved.

With no further business to be addressed the meeting was adjourned.

Max C. Firth, Chairman

Matthew L. Colton, Clerk
